

Innovative Sales

A Total Transportation Solution

What We Do

We provide the most fuel efficient products to the transportation industry in the most efficient way.

How You Benefit

We provide tested solutions that are 100% financed, installed on site, and paid for by a percentage of the return on investment. We do not affect a fleet's cash flow on the front end because there are no up front costs. The financing is set up based on a percentage of the return on investment (ROI). This results in a positive cash flow to the fleet.

How We Do It

Innovative Sales conducts a thorough fleet evaluation. Innovative Sales then makes recommendations of tested products based on each customer's specific needs. Innovative Sales provides 100% financing of those products including on site installation. Innovative Sales sets up the payment schedule based on 80% of the most conservative estimate of the true return on the investment (ROI).

Our Process

- An Introductory meeting is set up
- A confidentiality and a non-binding commitment letter are signed agreeing to move forward with the evaluation process
- Fleet data is gathered and validated and the credit approval process is started if financing is being considered as part of the proposal
 - The proposal is presented to customer
